PLUG AT INLET

RESPONSE TO REQUEST FOR INFORMATION

Commissioner for Patents
Mail Stop Petitions
P.O. Box 1450
Alexandria, VA 22313-1460

Dear Sir:

The following remarks and supporting evidence are submitted in response to the Request for Information mailed September 23, 2010. This Response supplements the evidence and arguments presented in the Petition to Accept Unavoidably Delayed Payment of Maintenance Fee and for Reinstatement Under 37 C.F.R. §1.378(b) filed June 29, 2010 ("Petition").

I. The Request for Information

The undersigned counsel thanks the Examiner for the courtesies extended during telephone interviews on November 9 and 19, 2010 during which the present Petition and the Request for Information were discussed. The Request for Information mailed September 23, 2010 seeks the following information:

1. A declaration from Ms. Patrice M. Potter and others at Baker & Daniels with first hand knowledge of information relevant to the present Petition and the

circumstances surrounding the delay in paying the maintenance fees for the '937 Patent.

2. A description of the steps in place at Baker & Daniels to ensure that the maintenance fees for the '937 Patent were timely paid, including an explanation of who at Baker & Daniels was responsible for tracking and paying the maintenance fees and the method that this person or entity used for tracking the fees.
3. Information regarding the Computer Packages, Inc. ("CPI") docket system, its use in the industry and why it is a reliable system.
4. The process Baker & Daniels used to convert data to the CPI system and the integrity and error checks that Baker & Daniels used in the process, the tests conducted to verify the completeness and reliability of the data in the system, an explanation of how the data entry was accomplished and how the error occurred.
5. A Statement Under 37 C.F.R. §3.73(b).¹

In addition to the remarks that follow, Petitioner submits herewith (a) information from CPI (Exhibit B), (b) a Declaration of Patrice M. Potter (Exhibit C), (c) a Declaration of John F. Hoffman (Exhibit D) and (d) additional supporting evidence (Exhibits E-I).

II. The CPI Docket System

During the interview with the Examiner on November 9, the undersigned counsel advised the Examiner that Petitioner is not asserting any defect or fault with the CPI system. Rather, as explained in greater detail below, Petitioner alleges that a clerical error in making a docket entry into the CPI system was the error that resulted in unavoidable delay in paying the maintenance fees. Petitioner further advised the Examiner that the pertinent data with respect to the issue date of the

¹ The Statement Under 37 C.F.R. § 3.73(b) is attached as Exhibit A.

'937 Patent and the maintenance fee deadlines generated by the CPI system were accurate. Thus, the CPI system functioned appropriately with respect to the '937 Patent.

Nevertheless, pages from the CPI website at **www.computerpackages.com** and a list of representative clients that Petitioner obtained from CPI are attached hereto as Exhibit B in response to the questions raised in the Request for Information. According to the site, "CPI has over 40 years of being the most successful company in providing IP management software and services to corporations and law firms." The CPI system includes "unlimited training and support in the use of the system." CPI asserts that it "has completed more successful conversions than all other suppliers combined." With respect to annuity systems, CPI claims "[u]nique use of Patent Office electronic data to check" its clients' data.

The representative client list includes corporations and law firms from the following 23 countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, India, Ireland, Israel, Italy, Mexico, the Netherlands, Norway, Saudi Arabia, Scotland, Sweden, Switzerland, the United Kingdom, the United States and Venezuela. Thus, the CPI docketing system is relied on by law firms and companies throughout the world.

The following table identifies CPI law firm clients that rank in Intellectual Property Today's top 25 patent firms based on utility patents issued in 2009²:

Firm	IP Today Patent Rank
Oliff & Berridge	4
McDermott, Will & Emery	11
Finnegan, Henderson, Farabow, Garrett & Dunner	14
Wilson, Sonsini, Goodrich & Rosati	17
Buchanan Ingersoll	20
Schwegman, Lundberg, Woessner & Kluthh	21
Baker Botts	25

² Exhibit E

The following table identifies CPI law firm clients that rank in Intellectual Property Today's top 25 trademark firms based on trademark registrations issued in 2009³:

Firm	IP Today Trademark Rank
Barnes & Thornburg	7
McDermott, Will & Emery	10
Husch Blackwell Sanders ⁴	11
Nixon Peabody	15
Lewis & Roca	18
Baker & Hostetler	24

The following table identifies CPI corporate clients that rank in USPTO top 25 based on utility patents issued from 2005 to 2009⁵:

Company	USPTO Patent Rank
Hewlett-Packard Development Company, L.P. ⁶	6
Sony Corporation ⁷	8
Fujitsu Limited ⁸	12

The following table identifies CPI corporate clients that rank in the Trademark Insiders top 25 based on the number of trademark applications filed in the first three quarters of 2007⁹:

Company	USPTO Trademark Rank
Time Warner	1
The Walt Disney Company	3

³ Exhibit F

⁴ Appears as Husch, Blackwell, Sanders, Welsh & Katz on the CPI list.

⁵ Exhibit G

⁶ Listed as Hewlett-Packard Company on the CPI list

⁷ Listed as Sony Corporation of America and Sony Computer Entertainment America on the CPI list

⁸ Listed as Fujitsu America, Inc. on the CPI list

⁹ Exhibit H

PepsiCo, Inc.	12
Bristol-Myers Squibb Company	13
Hasbro, Inc.	16
Estee Lauder, Inc. ¹⁰	19

The following table identifies CPI law firm clients that rank in top 25 of the National Law Journal's list of the 250 largest U.S. law firms¹¹:

Firm	NLJ 250 Rank
Baker & McKenzie	1
Jones Day	3
Hogan Lovells	4 ¹²
Latham & Watkins	5
White & Case	7
Greenberg Traurig	8
Mayer, Brown, Rowe & Maw	10
Morgan, Lewis & Bockius	14
Weil, Gotshal & Manges	15
Orrick, Herrington & Sutcliffe	17
Dewey & LeBoeu	18
Gibson, Dunn & Crutcher	20
Holland & Knight	22
McDermott, Will & Emery	23

¹⁰ Listed as Estee Lauder Companies, Inc. on the CPI list

¹¹ Exhibit I

¹² Hogan Lovells appears on the CPI Client list as Hogan & Hartson. Hogan Lovells was formed in May of 2010 when Hogan & Hartson merged with Lovells.

These tables and the accompanying exhibits clearly demonstrate that the largest, most sophisticated companies and law firms rely on the CPI docketing system. Nearly 30% of the law firms with the largest patent prosecution practices use the CPI system. More than half of the 25 largest law firms rely on the CPI system. As set forth in the Declaration of Mr. Hoffman, Baker & Daniels has found the CPI docket system to be reliable. (Hoffman Declaration ¶12).

III. There Was in Place at Baker & Daniels a Business Routine for Performing the Clerical Function of Docketing and Paying Patent Maintenance Fees That Could Reasonably be Relied Upon to Avoid Errors in its Performance.

During the time period relevant to the present petition, Baker & Daniels' paralegal, Ms. Potter, was responsible for docketing and ensuring timely payment of the maintenance fees for the '937 Patent. Baker & Daniels utilized the CPI docket system for tracking and paying maintenance fees. Baker & Daniels used the following business routine for ensuring proper performance of that function and avoiding errors:

1. A file number was assigned to the matter. (Potter Declaration, ¶9.a.).
2. A docket entry was created for the matter and the patent issue date was entered into the docket. The docket system automatically calculated maintenance fee due dates based on the issue date. (Potter Declaration, ¶9.b.).
3. The data from the Baker & Daniels docketing system was electronically transferred to CPI. CPI prepared reports by client for all maintenance fee and annuity fee payment deadlines for a particular calendar quarter. CPI forwarded these reports to Baker & Daniels. Baker & Daniels typically worked at least one quarter ahead of time to ensure clients had adequate time to decide which maintenance and annuity fees to pay. For each report prepared by CPI, the responsible paralegal issued a letter to the client seeking payment instructions. The report for the client was enclosed with the letter. (Potter Declaration, ¶9.c.).

4. Upon receiving payment instructions from the client, Baker & Daniels forwarded the instructions to CPI, which paid the fees and billed Baker & Daniels for the fees. (Potter Declaration, ¶9.d.).

Ms. Potter followed this procedure with respect to the '937 Patent. (Potter Declaration, ¶10).. The CPI system accurately calculated the maintenance fee due dates for the '937 Patent. (Potter Declaration, ¶10).

To ensure that dates in the CPI docket system were correct, the paralegal would print out a sheet that summarized the docket data entries for each matter. That sheet together with the physical file was then routed to the responsible attorney. The responsible attorney verified that the docket entries were correct. (Potter Declaration, ¶15; Hoffman Declaration ¶8). Baker & Daniels also used a periodic audit procedure to verify that data in the docket was accurate. All intellectual property paralegals and docket clerks throughout Baker & Daniels would periodically travel to the office whose docket data entry was being audited. One of the paralegals would run a docket report showing the docket entries for all active patent matters. The paralegals and docket clerks then reviewed the physical files for each matter and confirmed the accuracy of the data entered into the docket system for each matter. (Potter Declaration, ¶14).

Thus, Baker & Daniels used one of the leading computerized docketing systems and an elaborate data integrity verification process to ensure that data was correctly entered into the docketing system, that maintenance fees were appropriately tracked and that the fees were ultimately paid. It should be noted that a single, reliable docketing system is all that is required by a prudent and careful person to demonstrate unavoidable delay. It is not necessary to also have a backup or contingency system. See California Medical Products, Inc. v. Tecnol Medical Products, Inc., 921 F.Supp. 1219, 1259 (D. Del. 1995). Accordingly, the system in place at Baker & Daniels clearly meets the standards for a business routine that can be relied upon to avoid errors in the tracking and payment of maintenance fees. As discussed below, a clerical error by a fully trained and reliable employee, namely, Ms. Potter, was the error that resulted in the delay in payment of the maintenance fees.

IV. Ms. Potter Changed the Status of the '937 Patent in the Docket System to "Abandon" and this Erroneous Docket Entry Was the Cause of the Unavoidable Delay in Paying the Maintenance Fees for the '937 Patent.

As noted in the original Petition submitted in this matter, Baker & Daniels' file does not contain any instructions not to pay the maintenance fees for the '937 Patent or to otherwise allow the patent to expire. Mr. Harter's declaration clearly states that no such instructions were given. Nevertheless, on December 26, 2002, Ms. Potter erroneously updated the "Application Status" field in the docket entry for the '937 Patent to "Abandoned." (Potter Declaration, ¶11). Because the '937 Patent was erroneously listed as "abandoned" in the docket system, data relating to the '937 Patent was not transferred to CPI when the docket data was electronically transferred to CPI as explained above. As a result, the maintenance fee report for Iron Out would not have included the maintenance fee payment deadlines for the '937 Patent. (Potter Declaration, ¶12). Because the docket entry for the '937 patent was erroneously marked "abandoned," Baker & Daniels did not advise Mr. Harter or anyone else at Iron Out of the deadlines for paying the first and second maintenance fees, with the result that maintenance fees for the '937 Patent were not paid. (Potter Declaration, ¶13). Thus, Ms. Potter concludes that the error of marking the '937 Patent as "abandoned" was the cause of the failure to pay the first and second maintenance fees for the '937 Patent and resulted in expiration of the '937 Patent. (Potter Declaration, ¶12).

But for Ms. Potter's error, the due dates for the maintenance fees for the '937 Patent would have appeared on the reports provided to Baker & Daniels by CPI. The dates would have been reported to Mr. Harter and Mr. Harter would have instructed Baker & Daniels to pay the fees and the fees would have been promptly paid. Thus, the '937 Patent would never have been expired.

V. Ms. Potter Was Sufficiently Trained and Experienced With Regard to the Business Functions and Routines Described Above for their Performance that Reliance on her Represented the Exercise of Due Care

Mr. Hoffman was Ms. Potter's immediate supervisor during all times relevant to this Petition. (Hoffman Declaration, ¶7). Mr. Hoffman is a highly experienced patent attorney, having been

admitted to practice before the PTO since 1973. (Hoffman Declaration, ¶1). During Ms. Potter's tenure with Baker & Daniels, she was trained on the CPI docket system by another long-term and reliable intellectual property paralegal. (Hoffman Declaration, ¶6; Potter Declaration, ¶5). Ms. Potter received further training when Baker & Daniels began using CPI's web based docket system. (Potter Declaration, ¶7).

Ms. Potter had been an intellectual property paralegal with docketing responsibilities for more than eight years at the time she erroneously marked the '937 Patent as abandoned in the docket system. (Hoffman Declaration, ¶9; Potter Declaration, ¶¶3, 6). She had been a reliable paralegal and docket clerk for that entire time and, as attested to by Mr. Hoffman, continues to be a reliable employee today. (Hoffman Declaration, ¶¶9, 10). Mr. Hoffman is not aware of any other error on the part of Ms. Potter that has resulted in a U.S. or foreign patent or trademark lapsing. (Hoffman Declaration ¶10). Mr. Hoffman concludes that Ms. Potter was sufficiently trained and experienced with regard to (a) patent docketing functions, (b) patent maintenance fee tracking and payment, (c) Baker & Daniels' docket data entry verification process and (d) the routine for performing these functions and processes that Baker & Daniels exercised due care in relying on her. (Hoffman Declaration ¶11).

In light of Ms. Potter's training, supervision and flawless track record, it is clear that Baker & Daniels' reliance on her represents the exercise of due care.

VI. Conclusion

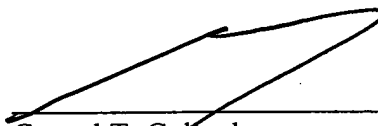

Baker & Daniels used a leading computerized docket system for tracking and paying maintenance fees. A highly trained, highly reliable intellectual property paralegal with years of docketing experience was responsible for tracking and paying the maintenance fees for the '937 Patent. She was supervised by a senior partner with decades of experience. Unfortunately, a clerical docketing error resulted in the fees for the '937 Patent not being paid. Petitioner respectfully submits that it has met the standard for showing unavoidable delay in payment of the first and second maintenance fees and

Computer Packages Inc

[About Us](#)[Systems](#)[Annuity Service](#)[Patent Audit Service](#)[Real Time Systems](#)[Computer Packages Online](#)[Events](#)[Contact Us](#)

About Us

CPI has over 40 years of being the most successful company in providing IP management software and services to **corporations** and **law firms**. Success in fast accurate conversion of data, unique electronic patent data audit & ability to make our system meet your requirements. Please review our client list and compare it with any other potential IP system or annuity service supplier.

CPI unique advantages:

IP Systems

1. Included in the cost of our system is unlimited training and support in the use of the system. This means CPI is the only supplier from whom you know your total cost before undertaking conversion to a new system.
2. Conversion is the high risk area of going to a new IP system. CPI has completed more successful conversions than all other suppliers combined.
3. Software quality - CPI is the only supplier with systems which have evolved with improvements with a stable US and European based staff of internal programmers. CPI is also the only supplier under the same ownership and management since the founding of CPI in 1968.
4. CPI is the only IP software supplier to support all versions of our system. This means no forced upgrades. PC based and web (hosted by you or CPI) systems are available.
5. CPI uniquely attaches patent office data to your system to improve your patent management.

Annuity Service

1. Unique use of patent office electronic data to check your data. This significantly reduces your risk of patent loss. CPI clients do not require restorations due to number and date errors. Other suppliers require many restorations, thereby greatly increasing your risk and cost.
2. Paperless annuity management improves your efficiency of annuity management and saves cost with improved reviews.

New unique CPI services

1. Patent Data Audit Service - Improve the quality of your data base or improve due diligence for acquisitions or divestitures. Confirm current status and assignee and provide assignment history.
2. Real Time Patent System - CPI provides real time update of your patent data base with electronic patent office data. This reduces keying and improves the quality, timeliness and completeness of your data.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re U.S. Patent No. 6,223,937

Issued: May 1, 2001

Title: Portable Dispensing Bottle with Dissolvable
Wax Plug at Inlet

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION OF PATRICE M. POTTER

Sir:

I, Patrice M. Potter, hereby declare as follows:

1. I am over 18 years of age and have personal knowledge of the facts and events discussed herein.
2. I am a paralegal on the Intellectual Property Team with the law firm of Baker & Daniels LLP. I have been a paralegal on the Intellectual Property Team with Baker & Daniels at all times relevant to the matters discussed herein.
3. I was hired by Baker & Daniels' Intellectual Property Group in November of 1994. When I first joined Baker & Daniels, my responsibilities on the Intellectual Property Group were primarily related to trademark matters. During that time, some of my duties included receiving office actions from the U.S. Trademark Office, docketing the office actions and ensuring that the responses were timely filed. I was also responsible for receiving registration certificates from the U.S. Trademark Office and foreign trademark offices and docketing the deadlines for filing declarations of continued use and incontestability and renewal applications and ensuring that the declarations and renewal applications were timely filed.

4. When I joined Baker & Daniels, another paralegal by the name of Lynda Myers was primarily responsible for patent matters. Lynda and I worked together during the time period from November 1994 to July 1997. Lynda moved from Ft. Wayne in or about July of 1997 and was required to resign from Baker & Daniels.

5. Prior to Lynda's departure, I was asked to train under Lynda to learn her patent related responsibilities, as the tasks required between the trademark area and patent area are very similar. For about one month prior to Lynda's departure, I trained with Lynda to better learn the patent system, the docketing software as it relates to patents and to better learn the process of patent prosecution.

6. Since about July of 1997 to the present date, I have been primarily responsible for patent matters at Baker & Daniels. Throughout that time, I have been responsible for receiving correspondence from the U.S. Patent Office and foreign patent agents, docketing the required due dates, preparing Information Disclosure Statements for the patent applications, monitoring U.S. and foreign due dates and deadlines, assisting in the preparation of formal papers for U.S. and foreign patent applications, and in filing U.S. and foreign applications. I have also been responsible for notifying Baker & Daniels' clients of maintenance fee and annuity fee deadlines and arranging for payment of maintenance fees and annuities upon receipt of instructions from the clients.

7. When I was hired, Baker & Daniels utilized a commercially available electronic DOS based docketing system from Computer Packages, Inc. ("CPI"). Sometime in 2000, Baker & Daniels upgraded the docketing system to a web-based system. I was trained on the proper use of the CPI DOS based system when I was hired by Baker & Daniels. CPI provided further training on the docketing system when it was converted to a web based system.

8. From October 24, 2002 (the date on which Iron Out acquired the '937 Patent) through May 1, 2005 (the deadline for paying the first maintenance fee for the '937 Patent) Baker & Daniels utilized the CPI web-based docketing system.

9. From October 24, 2002 (the date on which Iron Out acquired the '937 Patent) through May 1, 2005 (the deadline for paying the first maintenance fee for the '937 Patent) Baker &

Daniels' standard practice with respect to tracking maintenance fee deadlines, notifying clients of the deadlines and seeking payment instructions was as follows:

- a. A file number was assigned to the matter.
- b. A docket entry was created for the matter and the patent issue date was entered into the docket. The docket system automatically calculated maintenance fee due dates based on the issue date.
- c. The data from the Baker & Daniels docketing system was electronically transferred to CPI. CPI prepared reports by client for all maintenance fee and annuity fee payment deadlines for a particular calendar quarter. CPI forwarded these reports to Baker & Daniels. Baker & Daniels typically worked at least one quarter ahead of time to ensure clients had adequate time to decide which maintenance and annuity fees to pay. For each report prepared by CPI, the responsible paralegal issued a letter to the client seeking payment instructions. The report for the client was enclosed with the letter.
- d. Upon receiving payment instructions from the client, Baker & Daniels forwarded the instructions to CPI, which paid the fees and billed Baker & Daniels for the fees.

10. I followed this standard practice with respect to the '937 Patent. Attached as Exhibit A is a printout from Baker & Daniels' docket system. It indicates that File No. IRO0102 was assigned to the '937 Patent and the issue date of the patent was correctly entered into the docket. (Exhibit A, page 1) The CPI docket system also correctly calculated the 3½, 7½ and 11½ year maintenance fee due dates for the '937 Patent and entered them into the system. (Exhibit A, page 2).

11. I have no memory of having done so, but based on my review of the docket entries for the '937 Patent, I conclude that on December 26, 2002, I erroneously updated the "Application Status" field in the docket entry for the '937 Patent to "Abandoned." This field can be seen in Exhibit A, page 1.

12. Because the '937 Patent was erroneously listed as "abandoned" in the docket system, data relating to the '937 Patent was not transferred to CPI when the docket data was electronically

transferred to CPI as explained above in paragraph 9c. Therefore, the maintenance fee report for Iron Out would not have included the maintenance fee payment deadlines for the '937 Patent. Thus, the error of marking the '937 Patent as abandoned was the cause of the failure to pay the first and second maintenance fees for the '937 Patent and resulted in expiration of the '937 Patent.

13. Because the docket entry for the '937 patent was erroneously marked "abandoned," Baker & Daniels did not advise Mr. Harter or anyone else at Iron Out of the deadlines for paying the first and second maintenance fees, with the result that maintenance fees for the '937 Patent were not paid.

14. During all times relevant to the matters discussed herein, Baker & Daniels employed a firm-wide docket entry data verification process, including an audit procedure to ensure that data was properly entered into the CPI docket system. As part of that audit procedure, all intellectual property paralegals and docket clerks throughout Baker & Daniels would periodically travel to the office whose docket data entry was being audited. One of the paralegals would run a docket report showing the docket entries for all active patent matters. The paralegals and docket clerks then reviewed the physical files for each matter and confirmed the accuracy of the data entered into the docket system for each matter.

15. A further step of docket entry data verification process included printing out a sheet that summarized the docket data entries for each matter. That sheet together with the physical file was then routed to the responsible attorney. The responsible attorney verified that the docket entries were correct

16. The undersigned declares further that all statements made herein of her own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this Declaration and/or the '937 Patent.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re U.S. Patent No. 6,223,937
Issued: May 1, 2001
Title: Portable Dispensing Bottle with Dissolvable
Wax Plug at Inlet

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION OF JOHN F. HOFFMAN

I, John F. Hoffman, being hereby warned that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of this document, declare that:

1. I am a patent attorney and have been registered to practice before the US Patent and Trademark Office as an attorney since March 13, 1973. My registration number is 26,280.
2. I am presently the senior partner in the Intellectual Property Group's Ft. Wayne Indiana office of Baker & Daniels.
3. Prior to joining Baker & Daniels, I was a partner with the law firm of Jeffers, Hoffman and Niewyk. The Jeffers firm merged with Baker & Daniels in about September of 1991, and I joined Baker & Daniels in that merger.
4. When the Jeffers firm merged with Baker & Daniels, many other professionals also joined. One of the professionals that joined Baker & Daniels was a patent paralegal by the name of Lynda Myers. Lynda was responsible for, among other things, docketing all patent matters for

the Jeffers firm, and subsequently for the Baker & Daniels firm until the time she left in about July 1997.

5. Patrice Michele Potter ("Mickie") was hired by Baker & Daniels' Intellectual Property Group in November of 1994. During the time that she and Lynda were both employed by Baker & Daniels' Intellectual Property Group (November 1994 - July 1997), Mickie was primarily responsible for trademark matters. During that time, some of Mickie's duties included receiving office actions from the U.S. Trademark Office and foreign trademark offices, docketing the deadlines for responding to the office actions and ensuring that responses to the office actions were timely filed. Mickie's responsibilities also included receiving registration certificates from the U.S. Trademark Office and foreign trademark offices and docketing the deadlines for filing declarations of continued use and incontestability and renewal applications and ensuring that the declarations and renewal applications were timely filed.

6. Prior to Lynda Myers' departure, I asked Mickie to broaden her responsibilities by learning about patent matters, as the tasks required for docketing trademark matters and patent matters are very similar. For the time period of approximately one month before Lynda's departure, Mickie trained with Lynda to better learn the patent system, the docketing software as it relates to patents and the process of patent prosecution.

7. During all relevant times, I have been Mickie's immediate supervisor.

8. As part of Baker & Daniels' docket entry data verification process, each time Mickie made a new entry in the docket system, she printed out a sheet that summarized the docket entries. Mickie then routed that sheet together with the physical file to the responsible attorney. The responsible attorney verified that the docket entries were correct.

9. Prior to the docketing error which occurred on or about December 26, 2002 that resulted in the maintenance fees not being paid for U.S. Patent No. 6,223,937, Mickie had been a patent paralegal for over five (5) years and a trademark paralegal for over two (2) years. Thus, Mickie had over eight (8) years of docketing experience. During that time, Mickie has always been a very conscientious paralegal and I am not aware of any other docket entries that were incorrectly

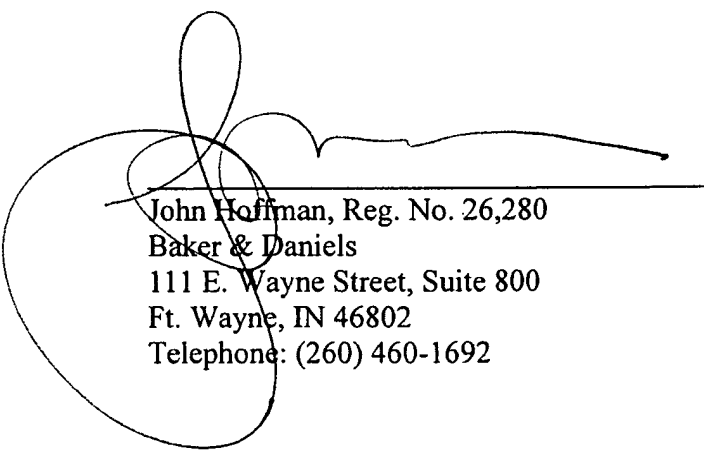

entered. I have always considered Mickie to be a conscientious and reliable paralegal. I continue to rely on her to docket and track patent maintenance fee deadlines according to the procedures outlined in her declaration.

10. Other than the docketing error which occurred on or about December 26, 2002 that resulted in the maintenance fees not being paid for U.S. Patent No. 6,223,937, I am not aware of any errors by Mickie which caused a lapse in a U.S. or foreign patent or trademark.

11. For all of the reasons mentioned herein, I believe that Mickie was sufficiently trained and experienced with regard to (a) patent docketing functions, (b) patent maintenance fee tracking and payment, (c) Baker & Daniels' docket data entry verification process and (d) the routine for performing these functions and processes that Baker & Daniels exercised due care in relying on her.

12. At all times relevant to the matters discussed in this declaration, Baker & Daniels utilized a commercially available electronic docketing system from Computer Packages, Inc. ("CPI"). I have always found the CPI system to be reliable.

2010 Top Patent Firms

The list this year is comprised of 356 law firms/individuals. Thank you to all who participated. Firms are ranked according to the number of utility patents issued in 2009 where the firm or individual is listed as the legal representative on the face of the registration.

- Averages and percentages have been rounded to the nearest tenth.
- There will be no additions to the list once it has been published.
- The survey form was available on our website from 1/1/10-2/16/10.

Rank	Name	2009 Utility	2009 Design	2009 Plant	Total 2009	Total 2008	Total 2007	3 Year Avg	2008-2009 % Change	Atty	Agts	Web
